Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6-8 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Wammock 5,245,769. Wammock shows, in figures 1-2, a shroud for a digging machine having at least a frame and a rotating ground engagement feature, having: a flexible panel 130 having first and second end portions and opposite side portion the first and second end portions being operatively coupled to the frame 34 adjacent the rotating ground engagement feature the panel having a width extending between the opposite side panels that is at least equal to a greatest width of the ground engagement feature 92 (figure 1).

As concerns claims 6 and 8, Wammock shows the ground engagement feature is capable of projecting ground material in a generally upward and rearward direction; the panel being positioned to deflect a substantial portion of the ground material laterally with respect to the ground engagement feature.

As concerns claim 14, Wammock having means (the way 130 is mounted to the frame to bow upward and away from the trencher 92) for generally biasing the panel away from the ground engagement means.

Allowable Subject Matter

3. Claims 2-5 and 9-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
